Cheryl's Story - "Now I have No Pain"

"My name is Cheryl Barnett and I'm from Cleveland, Tennessee. I was referred to Dr. Kaeser's office by my primary care because I had been experiencing a lot of pain and discomfort for months. As soon as I came into the office, I was greeted by a really friendly staff, and they made me feel very comfortable. I had to actually have major surgery reconstruction of my bladder, and Dr. Kaeser was an awesome doctor. My recovery was quick, and now I have no pain where I had pain for eight months consistently. I'm just really thrilled that you have a doctor like Dr. Kaeser. I want everyone to know that if you need help with a problem like mesh erosion or something to that effect that's affecting your bladder, Dr Kaeser is an awesome doctor who makes sure that you're taken care of. He did with me."
